LET'S DATE AGAIN

MVP Screen Flow

Complete UI reference for the design team — screen by screen, step by step

21	5	4	3
Screens	Day flow	Types	Intro

Solo user MVP · No login · 5-day streak · Version 1.0 · Prerna, Founder

COMPLETE SCREEN FLOW

21 screens · step-by-step user journey from first open to Day 5

INTRO	**I-1** Splash →	**I-2** Commitment →	**I-3** Name Only	
DAY 1	**D1-1** Slider →	**D1-2** Honest Moment →	**D1-3–9** Spark Quiz →	**D1-11** Type Result
BRIDGE	**B1-2** Bridge D1→D2 →	**B2-3** Bridge D2→D3 →	**B3-4** Bridge D3→D4 →	**B4-5** Bridge D4→D5
DAYS 2–5	**D2-1** Mood Candle →	**D3-1** Snapshot Card →	**D4-1/2** Drop Box →	**D5-1/2** Review + Invite

Each screen is detailed on the following slides

DESIGN SYSTEM

Colour palette · Typography · Spacing — apply consistently to all 21 screens

#C44569
Rose — CTAs, streaks, accents

#1A1A2E
Ink — Dark screen bg

#0E0E1F
Deep Dark — Immersive screens

#FDF8F5
Cream — App background

#F4F0EC
Chalk — Input fields

#8A7E78
Stone — Secondary text

#FBEAF0
Rose Light — Card fills

#ED93B1
Rose Mid — Labels on dark

#1D9E75
Teal — Connected mood

#BA7517
Amber — Grateful mood

#534AB7
Purple — Deep Current type

#FFFFFF
White — Text on dark

TYPOGRAPHY + SPACING

Playfair Display	**Display / Headings**	Wt 600 upright · 400–500 italic · Questions, type names, quotes, result screens
DM Sans	**Body / UI**	Wt 400 regular · 500 medium ONLY · Labels, body, buttons, captions. Never 600+

Design at 390px width · 16px screen padding · 4px base unit · Cards: 14px radius · Buttons: 100px pill · Inputs: 10px radius · No gradients · No drop shadows

I-1

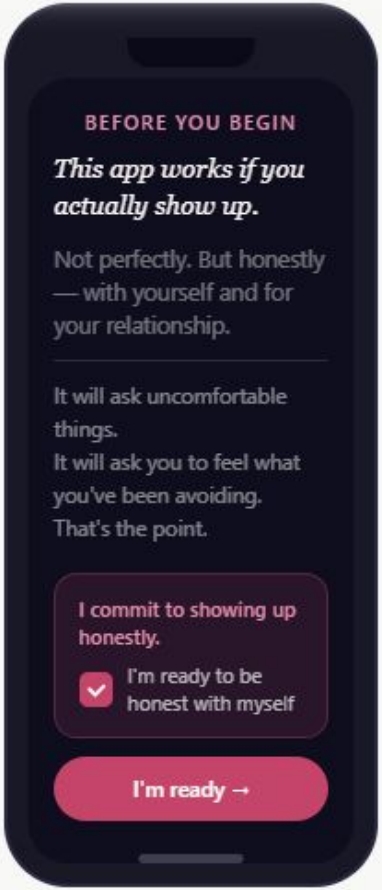
Splash screen

SCREEN I-1

Splash Screen

First thing the user sees. One sentence. One button. Zero friction. Product speaks before brand.

- Inclusions
- 1. Logo
- 2. DYK
- 3. Quotes
- 4. CTA- Begin



I-2

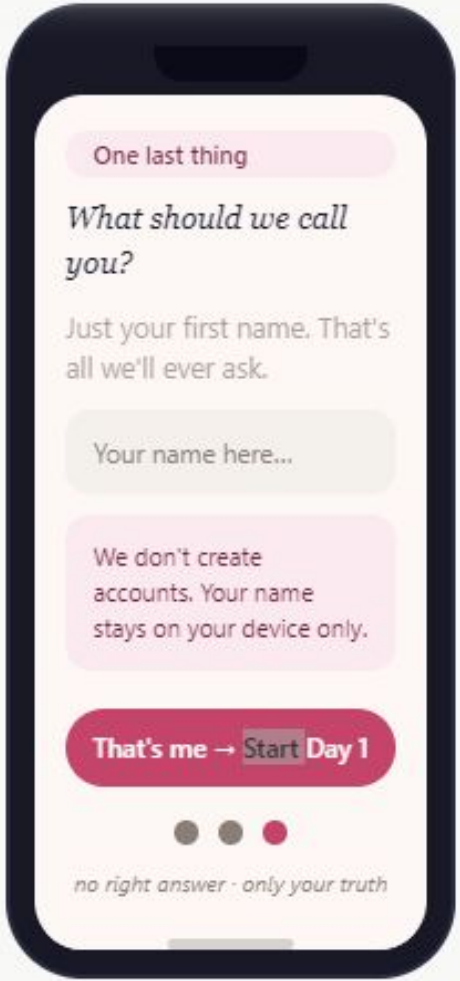
The commitment

SCREEN I-2

The Commitment

Pre-commitment creates accountability. Users who explicitly commit have higher Day 7 return rates.

- **Signals a private, serious moment.**
- Headline: 'This app works if you actually show up.'
- Three warning lines below divider — Emotional framing, not legal text.
- Commitment card
- **Checkbox MUST animate — ticks from unchecked to checked on screen load over 300ms. Never statically pre-ticked. This animation is intentional behaviour design.**
- CTA: 'I'm ready →' — rose pill. Arrow signals forward motion, not just confirmation.



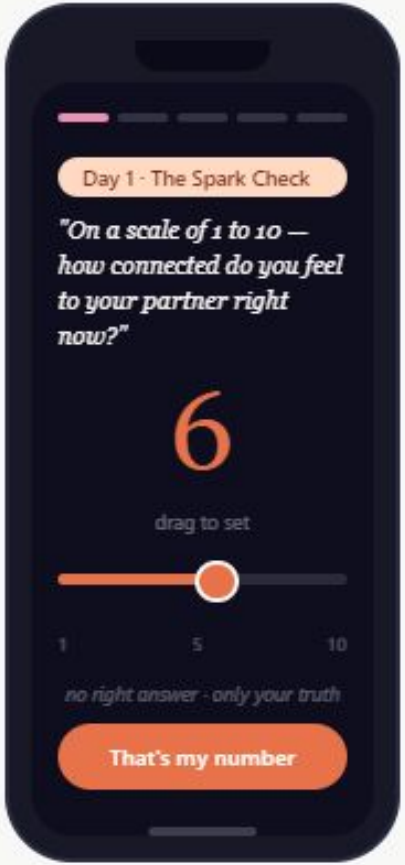
I-3

SCREEN I-3

Name Only

The only personal data ever collected. One field, first name only. No email, no password, no account.

- **Background: Light, warm, open.**
- Rose-light pill tag: 'One last thing' —
- Headline: 'What should we call you?' — no visible border. Placeholder: 'Your name here…'
- Privacy card: rose-light fill. Text: 'We don't create accounts. Your name stays on your device only.'
- **CTA disabled (50% opacity) until user types 2+ characters. Label: 'That's me → Start Day 1'**
- 3 progress dots bottom-centre. Third (active) = rose, first two = stone.
- Keyboard auto-opens on arrival. Input field auto-focused.
- Tap → enter Day 1 flow (no transition — direct load of D1-1).



D1-1

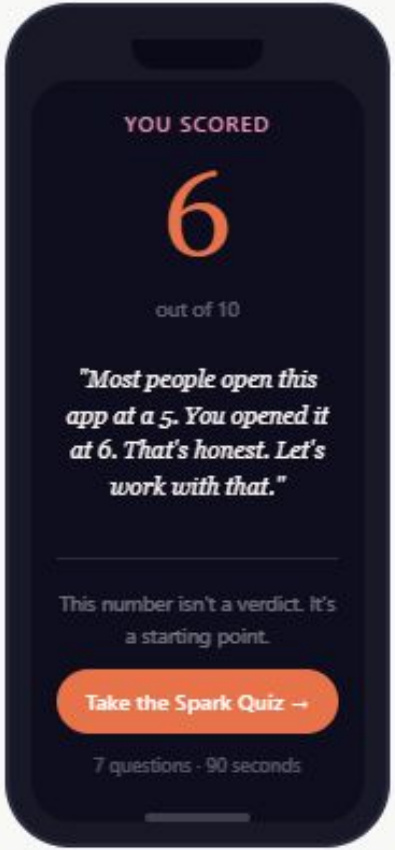
Connection slider

SCREEN D1-1

Connection Slider

Establishes the emotional baseline. Stored as baseline_connection_score — resurfaces Day 3 and Day 5.

- **Background: #0E0E1F. No nav bar. No back button. Full focus.**
- 5-day progress strip at top: Day 1 pip rose-mid, Days 2–5 at 75% transparency.
- Slider defaults to 5 (not 1). Anchoring at midpoint means users move intentionally.
- Large number: Playfair/Georgia 56px, rose #C44569. Updates live as user drags.
- Track: 6px height. Rose fill to thumb. 15% white opacity right of thumb. Thumb: 24px rose circle, 2.5px white border. 44×44px tap target.
- Haptic: UIImpactFeedbackGenerator light (iOS) / HapticFeedbackManager KEYBOARD_TAP (Android) on each integer.
- **CTA label: 'That's my number' — NOT 'Next'. The wording signals the number matters.**
- Tap ⟶ 0.4s fade ⟶ D1-2. The number visually animates from this screen into the large display on D1-2.
- STORE: baseline_connection_score + timestamp in local storage.



D1-2

Honest moment

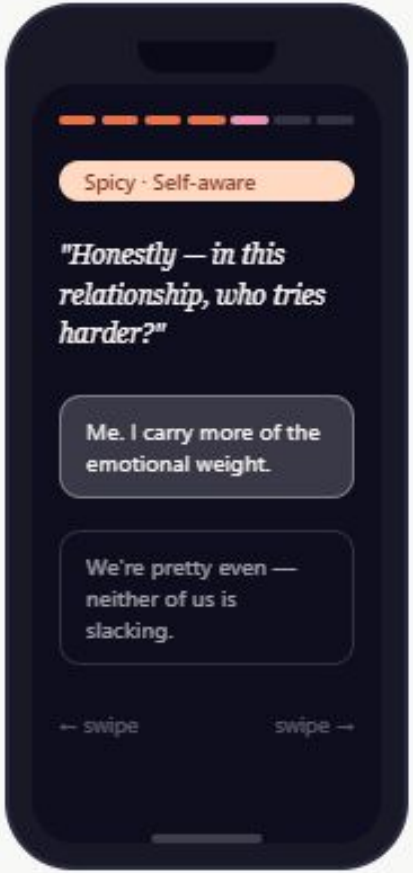
SCREEN D1-2

The Honest Moment

Makes the user feel seen in 60 seconds. Response copy changes based on their exact score. Pre-written — not AI.

Score	Response copy shown on screen (exact wording)
1–3	"Most people wouldn't admit this. You just did. That takes courage — and it's exactly why you're here. Let's start from honest."
4–5	"Most people open this app at a 5. You opened it at [N]. That's honest. Let's work with that."
6–7	"Most people open this app at a 5. You opened it at [N]. You're doing better than you think — and we'll make sure it stays that way."
8–9	"[N] out of 10. You're here because you want to protect something good. That's the smartest thing a couple can do. Let's keep it that way."
10	"10. Either things are genuinely perfect — or you're being very kind to yourself. Either way, we'll find out. Let's begin."

Screen is intentionally 4–6 seconds long. Do not rush entry animation. The pause is the experience.



D1-3–9

Spark Quiz (Q5 of 7)

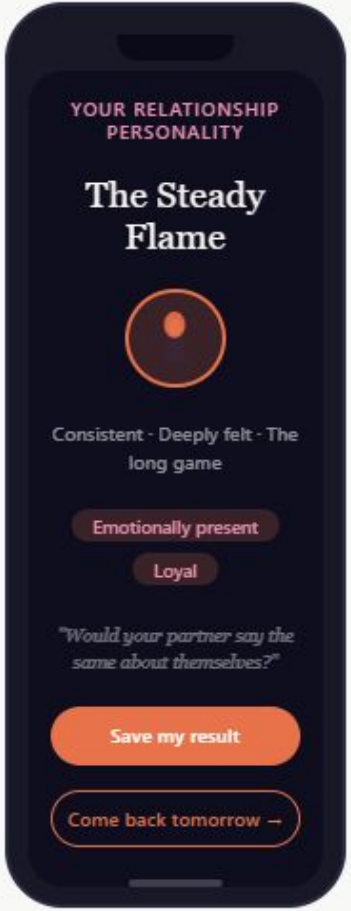
SCREENS D1-3 TO D1-9

Spark Quiz — 7 Questions

7 rapid-fire binary questions. Swipe or tap. Auto-advances 120ms after selection — no confirm button.

Q#	Mood badge	Question — Option A vs Option B
Q1	Warmth · Day-to-day	You'd rather your partner surprise you with: A heartfelt letter at 2am | B spontaneous trip
Q2	Honest · Conflict	Arguments start because of: A small things piling up | B one specific thing every time
Q3	Spicy · Attachment	Partner comes home: A come find you first | B decompress then come find you
Q4	Deep · Values	Relationship needs most: A more uninterrupted time | B better deeper conversations
Q5	Spicy · Self-aware	Who tries harder: A me, I carry more emotional weight | B we're pretty even
Q6	Warm · Vision	In 5 years: A still laughing at same stupid things | B built something we're both proud of
Q7	The decider	When things get hard: A talk it out even if messy | B give it space, things get clearer

Q7 is the tie-breaker (weighted +3). Store all 7 individual answers — not just the type result. Answers power prompt personalisation from Day 2.



D1-11

Personality type result

SCREEN D1-11

Personality Type Result

The shareable Day 1 result. 4 possible types — feels like a horoscope the user actually believes.

Type	Sub-label	Growth edge shown at bottom of card
The Steady Flame	Consistent · Deeply felt	You assume they know. They might not. Say it out loud more.
The Electric Spark	Spontaneous · High energy	The spark needs to land somewhere safe. Make sure they feel secure, not just excited.
The Deep Current	Thoughtful · The still water	Your depth can feel like distance. Let them in before you've figured it all out.
The Shifting Tide	Adaptive · Truth-teller	Honesty without tenderness is just criticism. The how matters as much as the what.

Hook line: 'Would your partner say the same about themselves?' — Playfair italic rose-mid. Last thing user reads. Plants the invite hook. Result card exported as 1080×1080px shareable image.

BRIDGE SCREENS D2-1

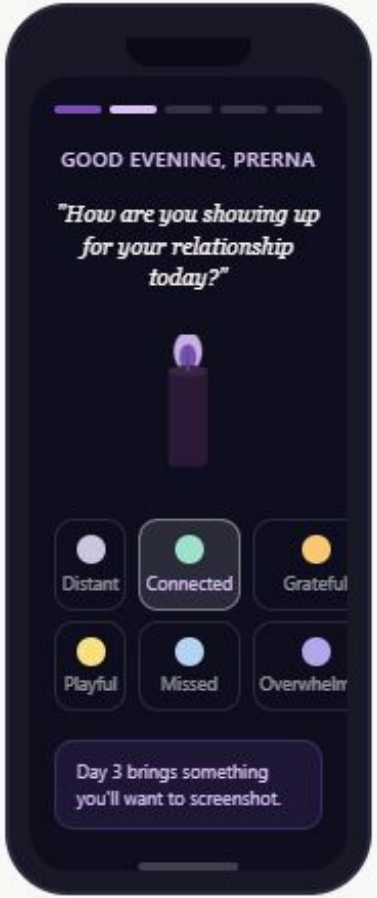
The Bridge Screen

Appears every day from Day 2 onward. Same 4-zone template — different content each day.

"One word you want to bring to your relationship today."
Single word input. Tap to select from 8 soft options (Patient / Present / Honest / Warm / Playful / Open / Gentle / Brave) or type their own.
This word appears:

- As a small pill on the Day 2 mood screen when they open it

Transition	Bridge quote (exact — original to LDA)
D1→D2	"The best relationships aren't built in grand moments — they're built in the ones you keep showing up for."
D2→D3	"Noticing what's good is not the same as ignoring what's hard. It's choosing where to look first."
D3→D4	"The things left unsaid don't disappear. They just find other ways to come out."
D4→D5	"A relationship that can hold honesty can hold anything."



D2-1

Mood candle

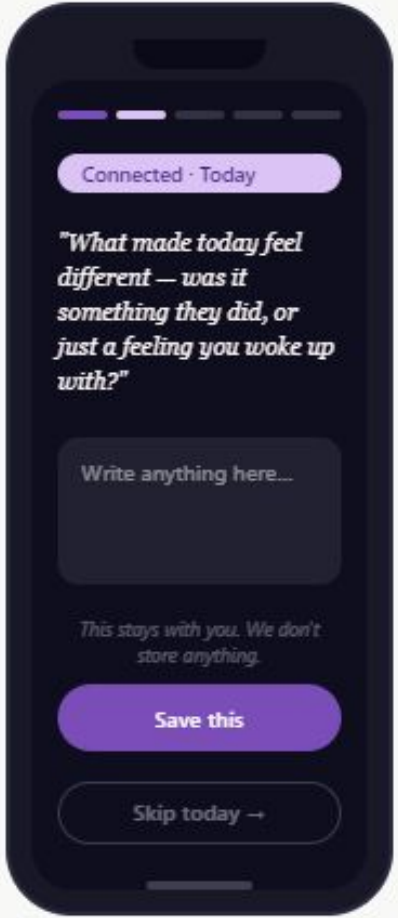
SCREEN D2-2

Mood Candle Screen

8 relationship-specific moods. Candle changes colour on selection — the most memorable UI detail in the app.

Mood	Flame hex	Flame behaviour	Segment
Distant	#C8C8E0	Slow, nearly still	Sadness
Connected	#9FE1CB	Steady, full, unhurried	Happiness
Grateful	#FAC775	Round, warm, full	Happiness
Frustrated	#F09595	Tall, agitated, fast flicker	Saturated
Playful	#FAE080	Dancing, irregular	Happiness
Missed	#B5D4F4	Small, still, lonely	Sadness
Overwhelmed	#AFA9EC	Bends sideways, erratic	Sadness
Loved	#C44569	Full, tall, confident, no flicker	Happiness

Right after mood selection and before the follow-up question appears, insert this single prompt as a full-screen moment:
"Before anything else — name one thing about your partner that made you feel something good recently. It can be tiny."
Single text field. Soft placeholder: *"Even the smallest thing counts."* 10–40 characters max. No pressure for length.
This immediately becomes a card — their words, in Playfair italic, on a lavender background. Auto-saved to their journal.
Takes 20 seconds.



D2-2

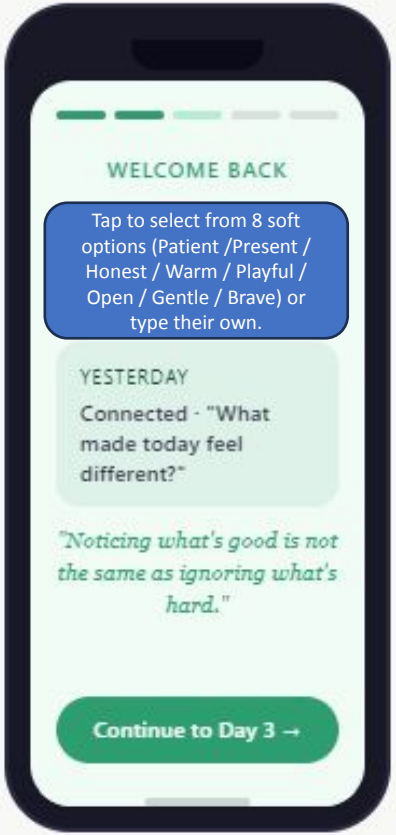
SCREEN D2-3

Follow-Up Question

One question based on the mood's emotional segment. Three question pools rotating daily.

Segment	Moods	Question pool — 3 options, rotated daily
Happiness	Connected, Grateful, Playful, Loved	(1) What made today feel different — something they did, or you noticed? (2) If you could bottle this feeling, what would the label say? (3) What about your relationship right now don't you want to forget?
Sadness	Distant, Missed, Overwhelmed	(1) Is the heaviness between you two, or outside getting in the way? (2) What would feel better by tomorrow — conversation, space, or just being seen? (3) If your partner could read one sentence about how you feel right now, what would it say?
Saturated	Frustrated only	Adapts to Day 1 Q2: If Q2=A (small things): 'What's the specific small thing that tipped it today?' · If Q2=B (one big thing): 'Is this the same thing again — or something new?' · Default: 'Frustration means something matters. What's underneath this?'

Privacy note ('This stays with you. We don't store anything') must be visible without scrolling. Skip CTA must always be present — never remove it.



B2-3

Bridge screen

SCREENS D3-1

The Bridge Screen

Appears every day from Day 2 onward. Same 4-zone template — different content each day

Transition	Bridge quote (exact — original to LDA)
D1→D2	"The best relationships aren't built in grand moments — they're built in the ones you keep showing up for."
D2→D3	"Noticing what's good is not the same as ignoring what's hard. It's choosing where to look first."
D3→D4	"The things left unsaid don't disappear. They just find other ways to come out."
D4→D5	"A relationship that can hold honesty can hold anything."

SCREENS D3-1

Input Screen

Appears every day from Day 2 onward. Same 4-zone template — different content each day

A single full-screen prompt before the T/F questions begin:
"Before we test what you know about them — what do you want them to know about you right now?"
One sentence. Open text. No character limit.
Becomes a shareable card on mint background: their words + "From [Name], Day 3" in small text.

D3-1

Assumptions test input

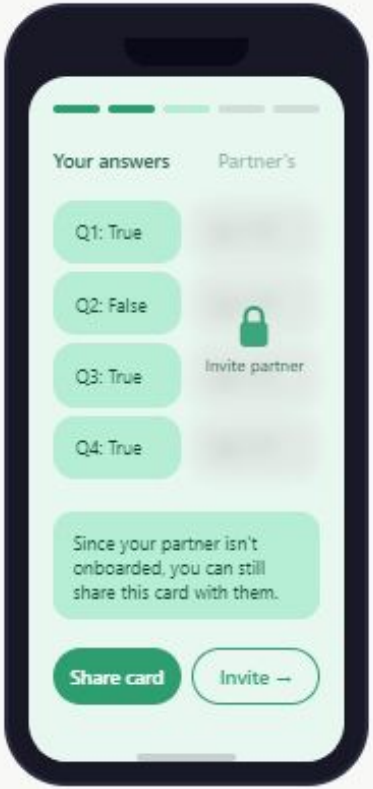
SCREENS D3-3

The Mirror Game

The Compatibility Challenge. 10 True/False statements about their partner. No results yet shown.

- Header: 'The Assumptions Test' — bold, confident. Sub-line: 'You think you know your partner. Let's test that.'
- 10 rapid True/False statements. One question fills most of the screen. User scrolls through. TRUE button = mint filled. FALSE = ghost outlined.
- **Progress bar at bottom — fills mint green as each statement is answered.**
- NO results shown on this screen. All 10 answers are collected first before any reveal.

#	Statement (all 10 — exact wording)
1	My partner has cried watching a movie in the last year
2	My partner has thought about quitting their job recently
3	My partner feels most loved when I give them time, not gifts
4	My partner has a dream they haven't told me about yet
5	My partner worries about money more than they let on
6	My partner would rather stay in than go out on most Fridays
7	My partner has a friendship they wish they'd kept up better
8	My partner feels prouder of themselves in our relationship than before it
9	My partner finds it easier to apologise than I do
10	My partner thinks about our future together more than they say out loud



D3-2

Results · blurred open loop

SCREENS D3-3

Day 3 · Mirror Game Results — The Open Loop

Most powerful conversion screen. Left shows user's answers. Right is blurred. Only partner can complete it.

- **This is the strongest conversion moment in the entire app.**
- After all 10 answered: Show LEFT column = user's answers visible. RIGHT column = blurred/frosted (partner's side, empty).
- **Bottom banner: 'Since your partner isn't onboarded yet, you can still share this card with them.' — Two CTAs: 'Share card' (export image) and 'Invite partner' (WhatsApp deep link).**
- Screenshot / Save icon at top right of screen — always visible. Tapping exports the card as an image.
- The open loop: user has answered 10 questions but cannot see if they were right. The ONLY way to resolve the tension is to invite their partner. The invite link writes itself.
- **Why Day 3 is critical: This is where users either drop or deeply invest. The game makes them feel the gap between assumption and truth — that gap is your entire product value proposition made visceral.**

SCREENS D4-1

Day 4 · The Bridge Screen

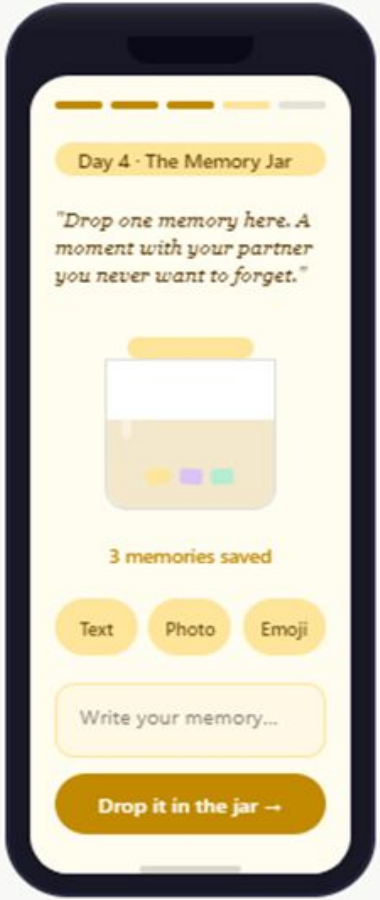
Drop one memory. Visual jar fills up. By Day 5, the jar is full — proof of 5 days of showing up

On the bridge screen entering Day 4, instead of just yesterday's recap — show a small visual:
"You've shown up 3 days in a row. That's morethan most people give their relationship in amonth."
Below it: a mini timeline showing Days 1–3 ascoloured dots (coral, lavender, mint) with Day4 as a pulsing empty dot waiting to be filled.Small text: *"Your jar is waiting for one morememory."*
The pulsing empty dot is the hook. It creates aspecific visual anticipation — not vague("come back tomorrow") but precise ("there isone empty dot and you can fill it today").

SCREENS D4-1

Day 4 · The Memory Jar

"One word that describes how your partner makes you feel. Justone."
Eight soft word options appear as tappable pills on the amberbackground: Seen / Safe / Lighter / Lucky / Proud / Loved / Calm/ Home.
They can tap one or type their own. The word appears insidetheir memory jar as a golden glow — visible when they open thejar view. It is the only personalised label inside the jar. On Day 5'sjar reveal, this word floats up as the jar opens.



D4-1

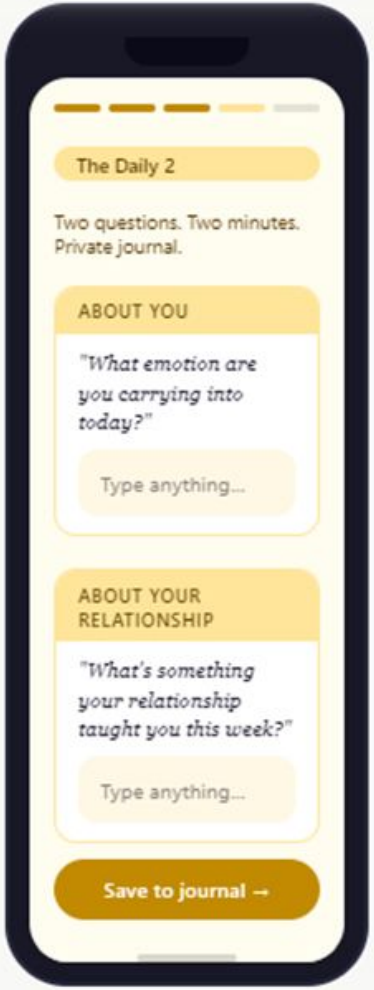
The Memory Jar

SCREENS D4-1

Day 4 · The Memory Jar

Drop one memory. Visual jar fills up. By Day 5, the jar is full — proof of 5 days of showing up

- **Day 4 accent: #C28A00 (golden amber). Background warm cream #FFFCF0.**
- Header prompt: 'Drop one memory here. A moment with your partner you never want to forget.'
- Three input types: Text / Photo / Emoji + date. User picks one. No pressure to write long — even an emoji + date counts.
- **The JAR: Beautiful illustrated glass jar on screen. Each day a paper note animates dropping in. By Day 5 = 5 notes, jar is full. This runs as a persistent visual metaphor across all 5 days — shown on the bridge screens and the Day 5 reveal.**
- Counter below jar: '[N] memories saved'. Starts at 0, increments each day after a memory is dropped.
- 'Drop it in the jar →' CTA — amber. On tap: a paper note animates flying into the jar (300ms arc animation). Then the jar gently shakes once.
- **The jar fills to 55% by Day 4, completing on Day 5. Design shows 60% filled water/golden light level on Day 4.**
- All memories stored on-device only. 'Your memories are private. Never shared, never seen by us.'



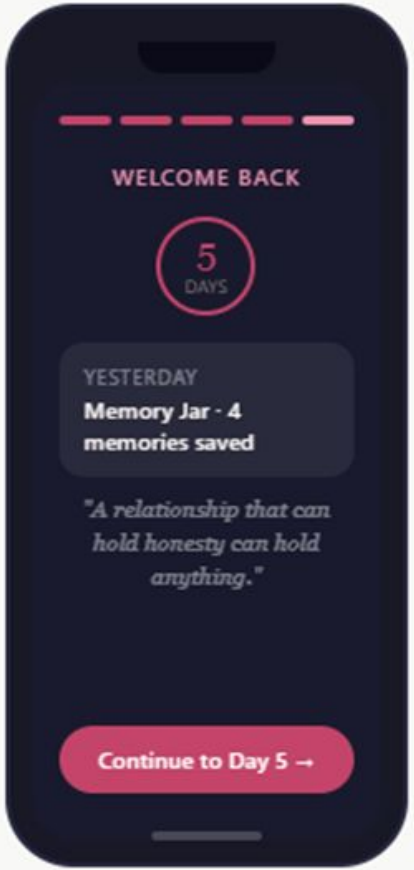
D4-2

SCREENS D4-1

Day 4 · The Daily 2

Two micro-journaling questions. One personal. One relational. By end of 7 days, a private journal built without realising it

- **Two questions, always paired, always in this order:**
- **Q1 — About you: 'What emotion are you carrying into today?' — labelled with amber tag 'ABOUT YOU'**
- **Q2 — About relationship: 'What's something your relationship taught you this week?' — labelled 'ABOUT YOUR RELATIONSHIP'**
- Both are open text. No character limit. No prompt suggestions. Just blank space.
- CTA: 'Save to journal →' — saves to the private on-device journal. After Day 5, journal is accessible from the Jar screen.
- **Key design insight: These are journaling prompts disguised as micro-interactions. Users are building a private relationship journal without realising it — the journal is the product's deepest retention hook.**
- All journal entries stored on-device only. No cloud sync in MVP. 'Your journal is yours alone.'
- Daily 2 format: always visible after the memory jar drop on Day 4 and Day 5+. Repeats daily after Day 5 as the ongoing habit loop.

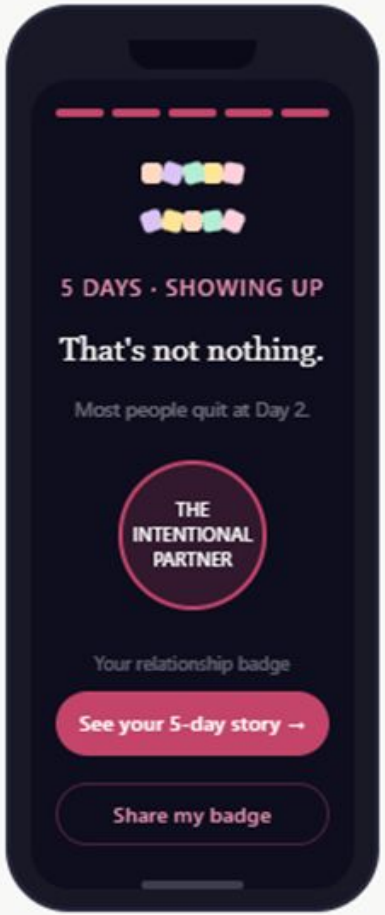


B4-5

Bridge screen

SCREENS D5-1 + D5-2

5-Day· The Bridge Screen



D5-1

Celebration + badge

SCREENS D5-1 + D5-2

Day 5 · The Streak Celebration

Full-screen celebration. Confetti. Badge. This screen must feel like a gift.

- Progress strip: all 5 pips rose-filled. First time user sees a complete strip — design this moment with care.
- **Full-screen confetti animation on entry. Rose + day colour confetti pieces raining down. 2 seconds, then settles. This is mandatory — 'Don't let it be silent.'**
- '5 days of showing up for your relationship. That's not nothing — most people quit at Day 2.'
- **Three badge options (assign based on personality type + quiz answers): 'The Intentional Partner' / 'The Curious Lover' / 'The Relationship Builder'. Badge shown as a glowing rose circle with bold Playfair text inside.**
- CTA: 'See your 5-day story →' leads to the Report Card screen.
- Secondary CTA (ghost): 'Share my badge' — exports as 1080×1080px image for Instagram/WhatsApp.

D5-2

Report card

SCREENS D5-1 + D5-2

Day 5 · Relationship Report Card

The 5-day story visualised. Mood journey graph. Type deep dive. Designed to feel like a love letter, not an evaluation.

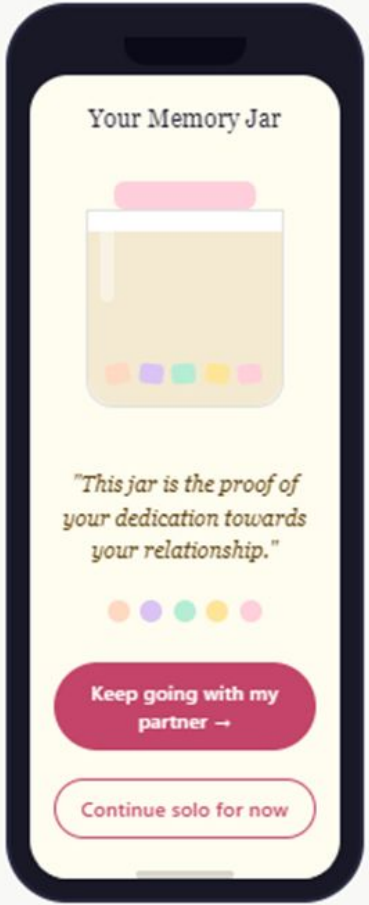
- **SECTION 1 — MOOD JOURNEY**
- 5-day emotion graph. Simple 5-bar chart. Rose bars, heights proportional to mood/connection scores per day. No axes, no numbers — visual arc only.
- One AI-generated insight below the chart: animated fade-in. E.g. 'You felt most connected on Day 2 and most distant on Day 5. That's a real pattern worth noticing.'

- **SECTION 2 — RELATIONSHIP TYPE DEEP DIVE**
- Expands on Day 1 personality type. Shows the type name prominently. Below it: 3 strengths (positively framed). Then 1 growth area — written as an invitation, not criticism.
- **Growth area copy rule: NEVER make it feel like a failing. Write as: 'The one thing that could make what's already great even better is...'**
- **SECTION 3 — MEMORY JAR**
- A golden tap target: 'See your Memory Jar →'. Opens the full jar screen (D5-3). The jar is shown as a small preview thumbnail with warm golden light spilling out.
- CTA at bottom: 'See full story' → scrolls to full Report Card. Ghost CTA: 'Share this story' → 1080×1920 export.

SCREENS D5-1 + D5-2

Day 5 · Relationship Report Card

After the report card — before the jar reveal — onefull-screen prompt:
"Five days in. One thing you want to do differentlyfor your relationship from tomorrow. Not aresolution. Just one honest intention."
Open text field. Becomes the last page of theirprivate journal. Appears on the shareable Day 5card alongside their badge. Playfair italic, rosebackground, their words.



D5-3

Full jar reveal

SCREENS D5-1 + D5-2

Day 5 · THE MEMORY JAR SYSTEM

A visual metaphor that runs across all 5 days. One paper note per day. Full jar = completed streak

INTERACTIONS + ANIMATIONS

Reference for all transitions, micro-interactions, and required screen states

Interaction	When	Specification
Fade from black	App open, bridge entry, day results	400ms fade in from #0E0E1F
Slide up	Follow-up questions, CTAs on bridge	12px up + fade in, 250ms, ease-out
Scale compress	Quiz option after selection	scale 0.95 + opacity 0.5, 150ms → next Q slides up 250ms
Count-up	Streak counter on bridge screen	Number ticks up from prev value, 300ms
Candle colour shift	Mood selection on D2-1	SVG fill transition over 400ms. Flame size/speed also shifts per mood.
Stagger reveal	Mood chips, trait pills	Each element 50ms delay after previous
Progress bar fill	Snapshot card on D3-1	Animate from 0 to final over 600ms on screen entry
Checkbox animate	I-2 on screen load	Unchecked → checked 300ms. Never pre-ticked statically.
Streak ring pulse	Bridge screen on increment	scale 1.0 → 1.1 → 1.0, 300ms
Haptic feedback	Slider integers, quiz selection	iOS: UIImpactFeedbackGenerator light · Android: HapticFeedbackConstants.KEYBOARD_TAP

REQUIRED STATES — design all of these for every input screen:

Empty Before interacting **Active/Filled** While interacting **Completed** After saving **Loading** AI reframe only **Disabled** CTA at 50% opacity before condition met

NOT IN THIS MVP

Do not design screens for any of the following. Answer is: Phase 2.

- Partner view or couple mode — any screen involving a second user
- Login, registration, email verification, account creation, password
- Subscription or payment screens (Razorpay — Phase 2)
- Relationship health dashboard or analytics charts
- In-app messaging or couple chat (LDA is NOT a messaging app)
- Expert therapist sessions or guided programs
- Social features or community inside the app
- Push notification settings page
- User settings page or profile page
- Voice notes or audio messages
- Conflict resolution module

Every time a feature from this list comes up during design — document it and move on. This MVP has one job: prove that a user will open the app for 5 consecutive days and feel it was worth their time.
